*Enteric fever and smallpox in Galveston, Tex.*GALVESTON, TEX., *December 17, 1900.*

SIR: I have the honor to report that there are a large number of cases of enteric fever prevalent in this city. One can only estimate them, for there is no ordinance that requires them to be reported to the board of health.

Dr. William Fischer, former health officer, estimated the number about 450. No effort has been made to try to trace the cases to any efficient cause. There are 6 cases of smallpox, a considerable number of diphtheria and scarlatina.

No report to the health officer is required to be made, and I am informed none is made, so the number of cases can only be estimated. There are 18 cases of enteric fever in the Sealy Hospital, and 20 in St. Mary's Infirmary. I find that every physician has from 6 to 15 cases.

Respectfully,

C. T. PECKHAM,  
Surgeon, U. S. M. H. S.
